

Exorcise the Devils by Dipquest

The Jersey Devils have been conducting raids across the Delaware River into Kensington and the surrounding neighborhoods of the Philadelphia sprawl and it is inconveniencing someone very important. The name of that VIP is for me to know, you just need to know that they are ponying up some top-notch Cyber if you can make them stop. You'll need to take down the Full Circle of leadership. Handle it however you like; erase their BitShilling wallets, set them up for arrest, disgrace them so they flee into exile, or something more...permanent. I don't care, just don't tell me about it. Plausible deniability is super fashionable these days.
