Hello Norm,

I have been made aware of your site friendoffoe.com and have seen several copyrighted materials of Judges Guild either in compiled form or pieces mealed into downloads on your website. These violate copyright laws as you are distributing and pirating material, both you and I know you weren't given permission from my company to do so. I want these materials taken down as they harm the company and its sales. This includes your Wilderness Hexplore and Wilderness campaigns download as they not only use copyright material the also use copyright artwork. Personal use is one thing but the second you upload it for all to see or download it is no longer personal. Take these down immediately.

Thank you,

Aaron Bledsaw
